Welcome to Johns Hopkins University’s Master of Science in Regulatory Science Program!

Welcome and Congratulations!
Welcome to Johns Hopkins University. We are excited to have you join our Master of Science in Regulatory Science program! The program offers students the ability to focus on biotechnology regulatory studies. It is especially well-suited for those who are interested in a regulatory career. The MS in Regulatory Science is a 10-course, part-time degree program that can be completed entirely online. The program’s curriculum prepares students to lead regulatory affairs initiatives in government and industry.

Course Requirements
Students in the MS in Regulatory Science program must complete six core regulatory courses, one practicum course, and three electives. It is recommended that the required core courses be taken in the following order, if possible:

6 CORE COURSES:
- 410.673 Biological Processes in Regulatory Affairs
- 410.649 Introduction to Regulatory Affairs
- 410.627 Translational Biotechnology: From Intellectual Property to Licensing
- 410.683 Introduction to cGMP Compliance
- 410.651 Clinical Development of Drugs and Biologics
- 410.676 Food and Drug Law

3 ELECTIVE COURSES:
Students may choose any three biotechnology elective courses for which they have satisfied the prerequisites. For a complete list of electives and specified prerequisites, please see the course catalog on the homepage of advanced.jhu.edu.

1 PRACTICUM COURSE:
- 410.679 Practicum in Bioscience Regulatory Affairs

The practicum should be taken at the end of the program (as the 9th or 10th course) after all core course requirements have been completed.

Important Registration Dates

</tbody>
</table>

Course Enrollment
We recommend that students register for courses as soon as possible once registration opens. Courses fill up quickly and early registration helps us determine if more course sections are necessary.

NOTE: To maintain their visa status, students with an F-1 visa may be required to be enrolled in a minimum of three courses each Fall and Spring term, of which only one can be an online course. If you are an international student, we do not recommend planning to complete the program onsite as the number of onsite courses are limited.

Advisors
Each student accepted into the program is assigned an academic advisor in accordance with the declared course of study. Advising is available year-round. Consultation takes place by phone, email, Internet or in person by appointment. We hope that you will find your studies with us interesting and valuable. Best wishes for success.
